INTRODUCTION

STINGER was born in the french Alps where the rich and famous of the world gather to enjoy the wild beauty of the mountains, luxury ski resorts and lavish french gastronomy.

To keep up with this, STINGER had to raise the bar further up as far as luxury car customization was concerned. The result is an array of very high quality products merging distinctive designs, most precious materials and high technology leading even to “never seen before” features such as 24K pure gold leaves covered brake calipers.

All of this enhancing the behavior, beauty and elegance of the vehicle to offer customers a really unique and distinctive driving experience.

STINGER 7 SERIES

STINGER
LUXURY CAR CUSTOMIZATION

The body kit offered fits any BMW 7 series Li, model F02 (2008 upward including restyled F02 2013)

The kit includes:

Carbon fiber side mirror covers with “STINGER” lettering on driver’ side

Carbon fiber door rocker panels with “STINGER” lettering

Carbon fiber side skirts

Carbon fiber rear air diffuser

Carbon fiber trunk lip

Carbon fiber front bumper

Carbon fiber air intakes in front bumper

Carbon fiber front lip

Carbon fiber fog light inserts

Side inserts with “STINGER” lettering

All BMW labels replaced by “STINGER” labels

22” Alloy Wheels

The design of the body panels has been made with several guidelines:

- perfect integration
- harmony
- aggressivity
- refinement
- detailing

Applying these criterias the panels fit the car beautifully maintaining perfectly even clearance between all the panels and without disrupting the existing lines but playing with them keeping the style smooth although very aggressive.

The weaves of the carbon fibers have been oriented at 45° to have perfect symmetry from the center line of the car and great care as been taken to reduce the weaves distortions as much as possible, thus showing the level of attention given during manufacturing process.

Each and every part is handmade and checked by our quality department.

PERFORMANCE PACK

In addition to the external look, some more features are offered to increase the performances.

The performance pack includes:

- MOV-IT 380mm front brake discs (vented and drilled) with 6-pistons calipers and high performance brake pads
- MOV-IT 380mm rear brake discs (vented and drilled) with 4-pistons calipers and high performance brake pads

MOV-IT brakes are made in Germany and are the finest brakes in the industry. No other product on the market can match their performances. This is the reason STINGER decided to use them. No compromise, only the best.

These brakes are providing so much braking force that the 2 tons of the 7-series are totally disappearing giving the impression to drive a light sport car. Late braking becomes an addiction especially as there is absolutely no fading even on repeated heavy braking.

- Carbon/ceramic brake systems are also available as an option, but in that case driver must keep an eye in the rear view mirror as cars behind will really panic when braking lights will turn on!

It is like hooking up the cable on the deck of an aircraft carrier when landing a fighter jet!

Customized Exhaust to increase the flow velocity of exhaust gas allowing the engine to expel them quicker reducing the back pressure.

Aside of the performances this is also source of a lot of pleasure as the melody and burble of the engine becomes more present although not too loud allowing long cruises.

ECM adjustment to exploit the full potential of the engine increasing power and torque without affecting the original reliability

When the high performance brakes make the car look light, the increased horsepower strengthen that impression by making it fly!

As an example the STINGER 750 Li Stage 1 has higher performances than the stock 760 Li.

The STINGER performance package is like bringing the Mr. Hyde to Dr. Jekyll...

Tour the family around in full comfort and when being alone behind the wheel turn into the king of the road making the asphalt scream for mercy and a lot of sport cars drivers be ashamed.

On the 750 Li and 760 Li even greater power increases can be achieved by replacing the turbochargers.

STINGER 750Li STAGE 1 :

ECM re-programming + Exhaust Line

STINGER 750li power: 505hp / 5600 rpm

BMW 750li power : 407 hp / 5500 rpm

STINGER 750li torque : 690 Nm / 3000 rpm

BMW 750li torque : 600 Nm / 1750 rpm

STINGER 750li Top Speed : 301 km/h

BMW 750li Top Speed : 250 km/h

STINGER 750li 0-100 km/h : 4,9 sec

BMW 750li 0-100 km/h : 5,3 sec

STINGER 750Li STAGE 2 :

ECM re-programming + Turbo Upgrade + Exhaust Line

STINGER 750li power : 550hp / 5800 rpm

BMW 750li power : 407 hp / 5500 rpm

STINGER 750li torque : 750 Nm / 3000 rpm

BMW 750li torque : 600 Nm / 1750 rpm

STINGER 750li Top Speed : 322 km/h

BMW 750li Top Speed : 250 km/h

STINGER 750li 0-100 km/h : 4,5 sec

BMW 750li 0-100 km/h : 5,3 sec

We also offer a package for the STINGER 760Li with power ranging from 600hp to 725hp

TAILOR MADE INTERIOR

After the exterior and the performances comes the interior.
Complete upholstery is also available:

Leather: cow, lamb, ostrich, snake, stingray, shark,...

Colors: matte, glossy, satin, metallic

Patterns: squares, diamonds,...

Stitching: single, double, gold wire,...

Embroidery: initials, logos,...

Anything if possible and is made as per client's request.

LUXURY CAR CUSTOMIZATION

LIMITED EDITION

For those looking for something even more special we also offer some limited editions such as our “24K Gold” which includes 24K pure gold leaves covering of brake calipers, gold lettering on the door rocker panels, gold inserts on the door handles, gold lettering on the driver’s side view mirror, gold lettering on the wheel center caps and on all the STINGER labels and a special identification plate mounted on the central console in the car.

The other limited editions are the “Silver” (using silver leaves), “Platinum” (using platinum leaves), and the rarest one being the “Palladium” (using palladium leaves).

The technology of metal leaves covering of brake calipers has been developed by STINGER and is being patented.

SILVER LIMITED EDITION

24 KARAT GOLD LIMITED EDITION

PLATINIUM LIMITED EDITION

PALLADIUM LIMITED EDITION

ONE OF A KIND

If this is not enough, rest our ultimate “ONE OF A KIND” programme where the only boundary is the client’s imagination. A kit can be designed making the client talk directly with the designers and engineers to define exactly his requirements and to match his vision for the exterior and interior of the vehicle. Many materials can be used including precious and semi-precious stones. This programme is available for any model of car and the kit will remain unique as STINGER commits by contract to manufacture it only for the original client, nobody else, preserving the true meaning of “ONE OF A KIND”.
